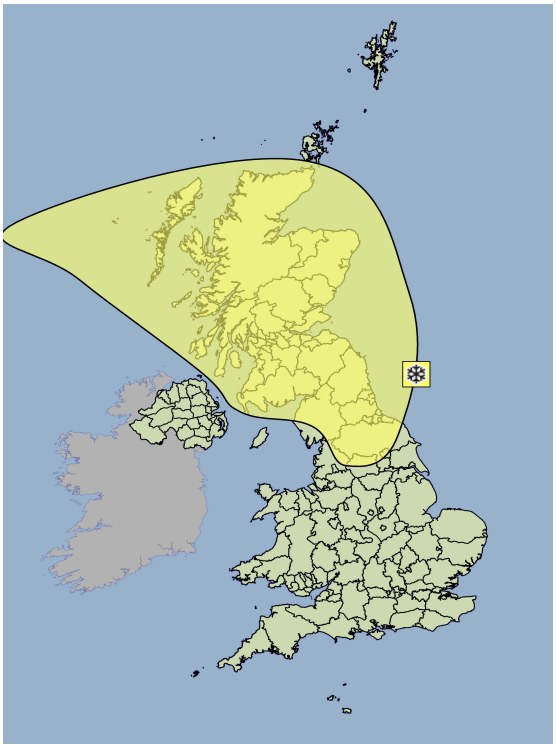
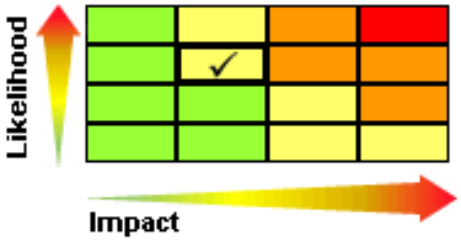
National Severe Weather Warning Service





Chief Forecasters Assessment
An Atlantic frontal system will meet colder air over northern parts of the UK, bringing the risk of snow, especially over high ground and the northern half of Scotland. Whilst much of this will turn back to rain at low levels, routes above about 150 m over northern Scotland and about 350 m over northern England will have a prolonged spell of snow, which will drift in the strong winds.

The Met Office have issued a **Yellow Warning** of **Snow**

Valid from **06:00 on Sun, 22nd Feb 2015** until **17:00 on Sun, 22nd Feb 2015**

Rain, sleet and snow is expected to spread east on Sunday. Rain is expected at lower levels across northern England and the southern half of Scotland, but further north snow falling to lower levels at times especially the far north and northeast of Scotland. Accumulations of 2 to 5 cm are expected in places above 150 m, with 10 cm or more over high ground above 300 m. Winds will gust to over 50 mph on coasts and hills, leading to drifting and blizzard conditions on high level routes.

The public should be aware of difficult driving conditions and the risk of disruption to transport.

This is an update to the alert issued on Friday morning.
